

SAMSUNG

Galaxy A57 5G

MEME CAMPAIGN PERFORMANCE REPORT

Awesome

WE ACHIEVED

A massive **560 Million Reach, driving strong visibility through highly shareable meme-led content.**

The campaign also delivered high engagement and audience interaction, building cultural relevance while opening opportunities to strengthen consideration and conversion.

OUR OBJECTIVE

- Drive strong awareness for the Samsung Galaxy A57 by ensuring widespread visibility across digital platforms and high-frequency content formats.
- Position the device as a high-value yet accessible smartphone, appealing to a broad audience looking for a balance of performance, design, and affordability.
- Communicate key product features in a seamless, non-intrusive manner while driving engagement and conversations to enhance product recall and overall brand presence

OUR STRATEGY

We leveraged meme marketing combined with AI-generated content to deliver high-volume, relatable creatives. By using trending formats instead of direct promotion, we ensured the messaging felt native to the platform. A mix of AI videos, original meme templates, and strategic creator collaborations helped amplify reach while maintaining authenticity and engagement.

PREMIUM MEME PROFILES

These profiles were leveraged to build strong brand perception and aspirational value. With high-quality content and a loyal audience base, they helped position the Samsung Galaxy A57 as a desirable and trend-relevant product. The integration of features was subtle yet impactful, ensuring the phone appeared naturally within premium, culturally relevant content formats.

REGULAR MEME PROFILES

These profiles focused on driving mass reach and relatability. By using widely recognized meme formats and everyday humor, the content ensured higher shareability and faster consumption. The goal was to normalize the product by placing it within familiar, high-frequency content that resonates with a broader audience base.

MEMEFLUENCERS

Memefluencers played a key role in driving engagement and amplifying reach. Along with their native content style, AI-generated videos were also deployed through these profiles to present the product in a more dynamic and engaging format. This combination helped deliver key features in a visually compelling way, increasing content retention, interaction, and overall recall.

PERFORMANCE METRICS

Performance metrics track key data points such as reach, engagement, and interactions to evaluate the overall effectiveness of the campaign. They help measure how well the content performed and provide insights to optimize future strategies.

TOTAL VIEWS
18.6 MILLION

ENGAGEMENT
2.9 MILLION

ENGAGEMENT RATE
15.6% (AVG 9-11%)

TOTAL COMMENTS
124K

SHARE RATE
8.2%

AUDIENCE SENTIMENT OVERVIEW

Breaks down comments into positive, negative, and neutral categories, helping understand the overall audience perception of the campaign. It also highlights what is working well and what needs attention, making it easier to amplify positive sentiment and address concerns effectively.

POSITIVE

54% (67K)

Humour and relatability resonated strongly with the audience.

NEUTRAL

26% (32K)

High passive consumption, with frequent friend tagging.

NEGATIVE

20% (25K+)

Price sensitivity and brand bias drove pockets of trolling.

NET SCORE

34

Engagement remains healthy, but deeper brand affinity is yet to be established.

CONVERSATION ANALYSIS

Analyzes user comments to identify recurring themes, conversations, and sentiment patterns, highlighting what audiences are actively discussing, responding to, and associating with the campaign.

RELATABILITY WINS (38%)

"Bro this is literally me 😂"

"Samsung admin knows the struggle"

PRICE SENSITIVITY (18%)

"Still costly for this range"

"₹1625 bhi zyada hai"

BRAND COMPARISON (16%)

"iPhone le leta isme"

"Camera iPhone jaisa hai kya?"

TROLL/ NOISE (14%)

"Overhyped phone"

"Chapri content"

FEATURE INTENT (14%)

"Gaming smooth hai?"

"Battery backup bolo"

HIGH-IMPACT OUTPUTS

The most significant, data-backed results that delivered outsized impact, highlighting outcomes that meaningfully influenced performance, audience engagement, and overall campaign effectiveness.

2.3x

Higher shares vs. product reels, with 31% of comments tagging friends, indicating strong peer-driven engagement.

1.8x

Higher replies per comment, indicating active conversations rather than passive reactions

62%

Majority of commenters were under 30, indicating strong Gen Z penetration.

KEY STRATEGIC WINS

1: Cultural Relevance Established

The brand is now perceived as fun, **self-aware**, and **culturally in tune**, moving away from a traditionally corporate image.

2: Entry into Consideration Set

14% of comments focused on product features, indicating active evaluation and a clear shift from awareness to consideration.

3: Algorithm Advantage

High saves and shares drove stronger algorithmic amplification, with meme-led content delivering **40–60%** higher reach efficiency than traditional creatives.

PERFORMANCE SHORTFALLS

1. Weak Conversion Signal

Conversion signals remain weak, with only **6–8%** of comments indicating purchase intent and no strong “I’m buying” narrative emerging from the audience.

2. Apple Comparison Drag

Apple comparisons remain prominent, with **1 in 6** comments referencing the brand, indicating an unresolved aspiration gap despite strong meme-led engagement.

3. Price Friction Visible

Price sensitivity is evident, with pricing concerns appearing in **20%** of negative comments.

PERFORMANCE ACROSS STAGES

Interprets the role of meme-led content across funnel stages, highlighting a dominant impact on awareness and engagement, where content drove strong visibility and interaction. Early signals of consideration are visible through user curiosity and feature-related discussions, while conversion impact remains comparatively limited, indicating an opportunity to strengthen lower-funnel influence.

AWARENESS

Very Strong – Maximum reach achieved.

ENGAGEMENT

Best-in-class performance.

CONSIDERATION

Emerging – Users actively evaluating.

CONVERSION

Weak – Purchase intent gap.

STRATEGIC NEXT MOVES

Outlines clear, data-backed next steps derived from performance insights, focusing on scaling high-performing content, addressing identified gaps, and improving overall campaign effectiveness

Meme → Proof Layering

Meme-led content supported by gaming tests and camera comparisons, addressing the 14% feature-seeking audience.

Smart Comment Mining

User queries like “Battery?” and “Camera?” were turned into reels and comparison videos, with pinned conversion hooks.

Apple Narrative Counter

Subtle counter-positioning against Apple Inc. by framing an “iPhone-like camera under ₹20K” narrative.

Comment-driven conversion triggers

Pinned comments reinforced value messaging like “flagship features under ₹2K/month” to drive consideration.

COMMENTS SNAPSHOT

A snapshot of audience sentiment highlighting both positive appreciation and constructive feedback, reflecting how the content drove conversations, engagement, and overall perception around the product.

MANAGING AUDIENCE SENTIMENT

To balance overall sentiment and reduce the impact of negative feedback, focused efforts will be taken to actively strengthen positive conversations and guide audience perception.

- Deploy comment seeding to consistently highlight product strengths and positive experiences.
- Actively build conversations around key features within existing comment threads.
- Use contextual replies to shift narrative and reinforce positive sentiment.
- Amplify and pin positive comments to boost visibility and sentiment.

RUNNER UP

LIVE TRACKER

IMPACT WE MADE

- Generated strong brand hype across platforms through meme-led content distribution.
- Created high product buzz, positioning the Samsung Galaxy A57 as a trending and widely talked-about device.
- Ensured clear visibility of key features by integrating them seamlessly within engaging content formats.
- Achieved high reach, engagement, and shareability while maintaining a non-intrusive and organic brand presence.

WHAT WE LEARNED

The campaign did what great campaigns do it worked. The numbers were strong, the engagement was real, and Instagram proved to be exactly the right space to bring the Galaxy A57 story to life. That's a win, and it deserves to be recognised as one. But here's what we're taking away from this, and we say this with genuine excitement rather than regret we saw just how powerful this idea truly is. And when something works this well in one place, you naturally start thinking about how far it could go everywhere else.

That's our biggest learning from this campaign. We stayed close to Instagram, and it delivered. But the idea had the legs to run much further across Twitter conversations, LinkedIn communities, creator content, UGC moments, comment sections every space where people are already talking about phones and making decisions

Imagine Galaxy A57 showing up in all of those conversations, organically and consistently. Not just seen, but talked about. So what we're bringing to the table next is simple let's take what already works and give it the full stage it deserves. Same strong idea, wider world.

Here are **five additional** strategic suggestions to make the campaign truly unmissable.

COMMENTS SEEDING ON MEME PAGES

A

Comments Seeding on Meme Pages involves strategically placing comments to spark and steer conversations under high-engagement posts. It increases visibility by tapping into existing audience traffic while subtly guiding how people perceive the content. When done right, it amplifies reach, drives engagement, and keeps the brand part of the conversation without feeling forced.

MEMES ON TWITTER (X)

B

Mememes on Twitter (X) help extend content beyond a single platform, keeping it active across multiple audience touchpoints. It allows the brand to plug into real-time conversations, making the content feel current and relevant. When used effectively, it boosts visibility and amplifies reach at scale while keeping the momentum going.

UGC REACTIONS (ORGANIC CREATORS)

C

UGC Reactions (Organic Creators) bring in authentic, no-mandate responses that feel natural and unforced to the audience. This makes the content more relatable and trustworthy, as it comes from real voices rather than structured promotion. Over time, it strengthens credibility, builds deeper connections, and drives more meaningful engagement.

LINKEDIN NARRATIVE BUILDING

D

LinkedIn Narrative Building focuses on shaping the brand's perception through thoughtful, opinion-led content rather than direct promotion. It builds credibility by adding value to conversations, making the brand feel more authentic and trustworthy over time. This approach gradually influences how audiences perceive the brand, positioning it as insightful, relevant, and reliable.

TWITTER TRENDING

E

Twitter Trending helps place the campaign at the center of real-time conversations by pushing a hashtag into the trending section. It drives instant visibility, curiosity, and large-scale audience participation through shareable content. This creates a ripple effect, making the campaign feel relevant, talked-about, and hard to miss.
